Working as part of our flexible, committed, award-winning team, you'll love our:

- Open plan, relaxed and focused environment
- Casual dress
- Life cover, Critical Illness Cover, contributory pension
- Perkbox membership (discounts and freebies)
- Competitive holiday allowance
- Well stocked kitchen – free soft drinks, tea, coffee, fruit
- Wellness allowance to keep you active

PURPOSE OF THE ROLE:

This is primarily a development DBA role and not a production support role.

We are looking to add to the DBA team someone that has a good grasp of database technologies, is a quick learner and is able to bring new ideas to the table.

This role would suit a second jobber. Consideration will be given to a developer that wants to move into an administration role or a Production Support DBA that wants to unleash their creative side and work in a more Agile environment.

This is a very busy team and the ability to work under pressure to tight deadlines is essential.

RESPONSIBILITIES:

- Ensure the availability and security of the SS/G Digital on-premise and cloud based SQL Server estate.
- Providing database support to developers, analysts and testers.
- Managing database builds and rollouts.
- Packaging databases for delivery to client sites.
- SQL Performance and Optimization.
- Involvement in Database design at least to physical level

- Liaison with Client sites in the UK, Europe and US (installation, releases, maintenance)
- Defining SQL Standards
- Data security
- Management of SQL Backups

REQUIRED SKILLS AND KNOWLEDGE:

Key Technical Skills Required

- SQL Server Administration skills (2016, 2017, and above).
- Strong T-SQL skills.
- Performance and Tuning including Query optimization.
- Power shell or other scripting language.
- Excellent communication skills
- Able to work to tight deadlines in very fast moving, agile environment.
- Ability to diagnose and solve complex problems.
- Ability to communicate technical issues to both technical and non-technical staff.

DESIRABLE SKILLS AND KNOWLEDGE:

Technical Skills

- Exposure to complex database builds using Visual Studio and TFS or similar.
- Exposure to Redgate Tool set.
- ER/Studio or other data modelling tool.
- Data Modelling.
- Automation skills, Jenkins or similar.
- Exposure to Cloud Based Database technologies.

Personal Skills

- Enthusiastic with excellent problem-solving skills
- Showing initiative / self-motivated to get the job done and improve practices
- Great interpersonal skills - ability to converse with both internal and external customers
- Excellent written and verbal communication
- Helpful and friendly, thriving in front of a challenge with a strong desire to succeed

Additional notes

- This role requires working one weekend a month for planned maintenance
- If the role evolves into external client support and on-call requirement it will attract overtime

The individual must demonstrate a strong desire to learn and develop their skills.
