

BI DEVELOPER

CHELTENHAM

FULL TIME, PERMANENT (FLEXIBLE)

At iPipeline, we pride ourselves on our culture. We believe in an enthusiastic atmosphere, encourage innovation, depend on creativity, and strive for success. We value our employees and understand that our continued success as a company relies heavily on the success of every individual. Our employees describe iPipeline offices as fun, energetic, 'can do', professional environments.

We empower our people and provide them with the opportunity to pursue personal growth and career aspirations. We work hard and play hard. We celebrate success.

As the market leader in our industry, we deliver ground-breaking technology to the financial services industry. Working at iPipeline allows you to play a part in enabling digitisation amongst millions of lives and most importantly, making a significant difference in securing people's financial future.

YOU CAN ENJOY:

- Innovative, inclusive and focused environment
- Flexible working
- Work/life balance
- New, contemporary, open-plan office space
- Company matched pension benefits
- Generous Life and Critical Illness Cover
- Perkbox membership (discounts and freebies)
- Competitive holiday allowance
- Well stocked kitchen of free soft drinks, tea, coffee and fruit
- An annual wellness allowance to keep you happy and healthy

PURPOSE OF THE ROLE:

We have an exciting opportunity for a proven BI Developer to develop and enhance iPipeline's data warehouse, the core foundation of iPipeline's Data Analytics offering. This role sits within the Data Operations Team, working closely with the Data Analytics team to support a wide range of data-driven solutions. We're starting on the journey to move our MI databases to the cloud so part of the role will be driving that forward.

RESPONSIBILITIES:

- Data warehouse design and implementation, including partitioning, indexing and other technologies

- Work closely with Data Analytics team to ensure database design, database performance and current ETL processes meet business requirements
- Designing new ETL processes as required, primarily using SSIS including the capture of output from machine learning processes
- Troubleshooting any MI and ETL issues
- Identifying any opportunities for enhancing existing ETL processes
- Improving data quality and supporting customer queries

SKILLS:

- Solid background in SQL Server, with demonstrable experience in data warehousing
- Good level of technical experience across the Microsoft SQL stack: T-SQL, SQL Server 2016 and above and SSIS.
- SQL Server performance tuning
- Strong problem-solving skills
- Experience of translating business requirements into technical requirements
- Experience of supporting SQL Server in a production environment
- Familiarity with source control systems such as GitHub or Azure DevOps
- Strong understanding of GDPR and principles of data masking and/or anonymisation
- Ability to communicate effectively across a wide variety of disciplines
- Experience of the following would be advantageous:
 - PowerBI data models
 - Understanding of SSRS administration
 - AWS
 - PowerShell
 - Salesforce
 - Python
 - R
 - Database deployment pipelines
- Experience within financial services also an advantage

DON'T HAVE ALL THE SKILLS?

Don't worry.

You might not have everything listed above but you might have some valuable transferable skills and experience.

You might be returning from a career break or feel you have taken a wrong turn in your career.

At iPipeline, it's about you and what makes you tick, not ticking every box.

To apply please email cheltenham.recruitment@ipipeline.com with your CV and covering note (don't forget to include those transferable skills).

For information on how we store applicant information, please see our [Job Application Privacy Policy](#).
