### YOU CAN ENJOY:

- Innovative, inclusive and focused environment
- Flexible working
- Work/life balance
- New, contemporary, open-plan office space
- Company matched pension benefits
- Generous Life and Critical Illness Cover
- Perkbox membership (discounts and freebies)
- Competitive holiday allowance
- Well stocked kitchen of free soft drinks, tea, coffee and fruit
- An annual wellness allowance to keep you happy and healthy

### PURPOSE OF THE ROLE:

We have an exciting opportunity for a Data Product Manager to own the iPipeline data assets. You will be leveraging a deep understanding of data, across both technology and statistics, and a strong business acumen to create new data-driven solutions in the protection & annuity markets.

## RESPONSIBILITIES:

- Own iPipeline's data propositions, applying product management principles to create innovative solutions powered by iPipeline data.
- Set the data strategy across reporting, dashboards, data services, machine learning & insight.
- Own the product road map, providing forward-looking release dates and surfacing any issues/critical dependencies
- Manage development resource to develop both new propositions and enhancements to existing products to execute on the vision.
- Work closely with the Enterprise Sales Team to identify new product development opportunities.
- Support the sales process, working closely with account managers to identify opportunities, create propositions and offer technical support.
- Build relationships with both customers & partners, to understand customers better and identify opportunities to drive more value.
- Identify opportunities for enriching iPipeline data assets and work closely with Data Operations team to build suitable ETL pipelines to capture the right data from new products in the right way.
- Identify opportunities for optimising processes within the existing product set and reduce technical debt.
- Work closely with the wider R&D function to implement best practise across the development function.
- Work closely with Data Client Services team to feed ideas into product funnel, and to implement new solutions into the marketplace in a coordinated manner.
- Develop new reporting solutions & insight internally, allowing key stakeholders to make data driven decisions.
- Champion the use of data within iPipeline and the wider industry.

## SKILLS/EXPERIENCED REQUIRED:

- Experience leading a data team is essential.
- Experience of using SQL to perform advanced data analysis is essential
- Experience of building data models and dashboards in PowerBI/DAX is essential
- Experience in SSRS is a strong advantage
- Numerate degree-level qualification is essential.
- Experience of R/Python/Powershell is an advantage

### The successful applicant must be:

**TECHNICALLY ABLE:** We're looking for individuals with a strong technical background within the Microsoft BI stack: demonstrable experience working with SQL, SSRS and Power BI/DAX.

**NUMERATE:** Insurance is a world driven by numbers; you will have a degree level qualification in a numerate discipline.

**BUSINESS SAVVY:** You need to have a clear understanding of how data sits within a wider commercial environment and be great at communicating to a wide variety of audiences.

**EXPERIENCED:** We need someone who can hit the ground running, drawing from a broad experience in delivering data solutions to customers. If you have experience in financial services, even better.

**CURIIOUS:** You will continually challenge and question the status quo.

To apply please email [cheltenham.recruitment@ipipeline.com](mailto:cheltenham.recruitment@ipipeline.com) with your CV and covering note (don't forget to include those transferable skills).
